Instruction: How to fold Pop-Up-Blind
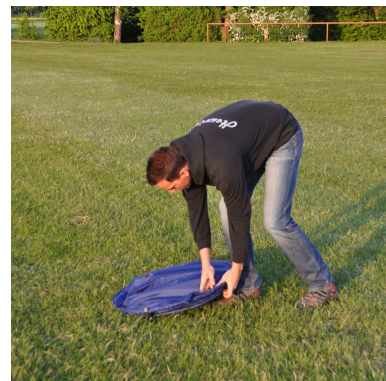

1. Place top of the blind at the ground. Grap with both hands the outer curves at the bottom side and bend the blind to the tip.

2. Bend the blind until it has an U shape. Remove left hand and rotate it clockwise. Then grap the blind again and rotate counterclockwise. This will bring bottom side towards you.

3. If the bottom side turns towards you then bring your right hand to your left hand to fold the Pop-Up-Blind completely.

4. For the save transport insert the folded Pop-Up-Blind into its carry case.
